First Meeting: Output

- ‘On November 1st 2007 IFCC-IUPAC and IHTSDO had a very positive discussion. Both sets of organisations agreed to work together to create an explicit linkage between the NPU terminology and SNOMED CT. They have created a Task Force to identify and agree on the technical preferred option of the linkage and the organisational framework for the activity to take place.’
- [It should be noted that this relationship is not exclusive on the part of either party]
